Office Action Summary

Application No.

10/029,288

Applicant(s)

KANG ET AL.

Examiner

Charles E. Anya

Art Unit

2194

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 4/7/05; 5/12/05.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

5-0-0

**DETAILED ACTION**

1. Claims 1-12 are pending in this application.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-12 are rejected under 35 U.S.C. 103(a) a. being unpatentable over applicant's admitted prior art (hereinafter referred to as AAPA pages 2-3) in view of U.S. Pub. No. 2001/0024066 A1 to Fu et al.**

As to claim 1, AAPA teaches a method of setting a communication environment between a mobile terminal and a smart card using a layered architecture of a protocol stack, the system comprising: if the mobile terminal provides power to the smart card, sending an answer-to-reset signal from the smart card to the to the mobile terminal (page 2 lines 8 - 14); determining whether or not the received answer-to-reset signal complies with an answer-to-reset signal pattern required by the mobile terminal (page 2 lines 16 - 21); if the received answer-to-reset signal complies with an answer-to-reset signal pattern required by the mobile terminal, analyzing the answer-to-reset signal transferred from the smart card to establish a communication environment (Step S104

Art Unit: 2194

page 2 lines 20 - 24); if the optimum communication environment is established, sending a command for requesting to open a logical channel to the smart card/opening the logical channel in response to the command for requesting to open the logical channel received from the mobile terminal, and sending a signal responding to the command to the mobile terminal (Step S105 page 2 lines 26 - 28, page 3 lines 1 - 2); and opening the logical channel to be used in the application to secure a communication channel between the smart card and the mobile terminal (Step S106 page 3 lines 7 - 8).

4. AAPA is silent with reference to an application from which communication is established between a smart card and a mobile terminal.

5. Fu teaches an application from which communication is established between a smart card and a mobile terminal (figure 2, figure 6 page 5 paragraphs 0092-0099).

6. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Fu and AAPA because the teaching of Fu improve the system of AAPA by providing applications related sub-layer that masks the difference between API sets within the smart card related layer and details of the smart card (Fu page 5 paragraph 0098).

7. As to claim 2, AAPA teaches the method as claimed in claim 1, wherein the answer-to-reset signal transferred from the smart card comprises at least one of a communication speed and a communication protocol (page 2 lines 13 - 15).

8. As to claim 3, Fu teaches the method as claimed in claim 1, in the determining step, if he received answer-to-reset signal does not comply with an answer-to-reset signal pattern required by the mobile terminal (figure 4 Step 402 page 4 paragraph 0071), the method further comprising the steps of: determining whether or not a process of a protocol and parameters selection is executed in the mobile terminal (figure 4 Step 404 page 4 paragraphs 0071/0072); if the mobile terminal executes the process of the protocol and parameters selections, sending a command for requesting to select the protocol and parameters to the smart card; determining whether the process of the protocol and parameters selections is supported by the smart card, which receives the command for requesting to select the protocol and parameters from the mobile terminal (figure 4 Step 406-410 page 4 paragraph 0072); and if the smart card supports the protocol and parameters selection, sending a signal responding to the command for requesting to select the protocol and parameters to the mobile terminal to ensure the communication channel between the smart card and the mobile terminal (figure 4 Step 406-410 page 4 paragraph 0072).

9. As to claim 4, Fu teaches the method as claimed in claim 1, wherein the smart card and the mobile terminal comprise a transmission layer for transmitting and receiving a data, and an application layer for processing the data, respectively (figure 2, page 2 paragraph 0048, figure 6 page 5 paragraphs 0098/0099).

Art Unit: 2194

10. As to claim 5, Fu teaches the method as claimed in claim 4, wherein the application layer of the smart card and the mobile terminal includes a plurality of applications, and the transmission layer of the smart card and the mobile terminal includes a plurality of communication environments capable of supporting the plurality of applications of the application layer (figure 2, page 4 paragraph 0070, page 5 paragraph 0095).

11. As to claim 6, the method as claimed in claim 4 wherein the transmission layer and the application layer are independently embodied to each other, so that one application supported by a plurality of communication protocols and one communication protocol supports a plurality of applications (figure 2, page 4 paragraph 0070, page 5 paragraph 0095).

12. As to claims 7-12, see the rejection of claims 1-6 respectively.

### ***Response to Arguments***

13. Applicant's arguments filed 512/05 have been fully considered but they are not persuasive.

Applicant argues in substance that (1) the AAPA prior art reference does not teach determining whether or not the received answer-to-reset signal complies with an answer-to-reset signal pattern required by the mobile terminal.

Examiner respectfully traverse Applicant's argument:

As to point (1), the AAPA prior art reference does in fact teach determining whether or not the received answer-to-reset signal complies with an answer-to-reset signal pattern required by the mobile terminal by determining if a new communication environment between the smart card and the mobile terminal could be established using protocol and parameters selection sent to the mobile terminal by the smart card (page 2 lines 16 – 25).

### ***Conclusion***

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6564995 B1 to Montgomery: directed to a smart card and application selection terminal system that allows a user to select applications.

15. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2194

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Anya whose telephone number is (571) 272-3757. The examiner can normally be reached on M-F (8:30-6:00) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, An Meng-Ai can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
